

Abstract（摘要）（最后写）

Introduction（引言）

What is the big problems you are addressing?(Craft the story, 4-8 bullet points)

Why is it important or interesting?(Craft the story, 3-6 bullet points)

What are previous solutions? What is the current state-of-art?(Relevant Literature, 4-8 bullet points)

What is your new solution? And why/when is it better than the old ones?(Craft the story,3-6 bullet points)

Related Work（相关工作）

Medical Image Segmentation (医学图像分割): 提一下 U-Net, U-Net++, ResUNet。

Attention Mechanisms & Boundary Losses (注意力机制与边界损失): 提一下注意力如何消除噪声, 边界约束在医学图像中的应用。

Methods（我们的方法）

Methods Overview（方法概述）

Dataset and Preprocessing(数据集及预处理)

方法(自己给新方法取名字)

Training Objective

Results（结果）

Experimental Setup and Evaluation Metrics (实验设置与评价指标 - 介绍你的超参数和 Dice/HD95 等)

Comparison with Classical and State-of-the-Art Methods (与经典算法及前沿方法的对比)

Backbone diagnostics(消融实验)

例如:

Model 1: 纯 U-Net (基线)

Model 2: ResUNet-18

Model 3: ResUNet-18 + CBAM

Model 4: ResUNet-18 + CBAM + Edge Loss (Ours)

随着模块一个个加上去, Dice 越来越高, HD95 越来越低。

Robustness under strict protocols (鲁棒性/可视化)

Discussion

Why does our method work? (原理解释)

Limitations

Conclusion

Acknowledge

Appendix (附录)
